

NEBOSH CERTIFICATE PRACTICE

The first part of the GC3 or NCC2 requires the completing of a workplace inspection and the spotting of a range of hazards. You may wish to use these pictures to carry out a mock inspection. If you want to complete inspection sheets and send up to two in to us for review we can give you feedback on layout, depth and content.

Examine the three pictures provided and then on a GC3 Observation sheet log details of **five different hazards** which you can see from at least two of the main hazard groups (e.g. physical, chemical, ergonomic, biological, welfare etc). You could also note hazards which you could foresee from the activities undertaken in each area e.g. if there is high level storage at some time there will be some MH and over reaching). Complete the observation forms in the following format.

If you send or email in your practice document make sure you include your name and contact details. If you have not heard back in 4 days please contact us to ensure we have received your document.

<i>Observations</i>	Control measures	<i>Timescale</i>
<p>Location of hazard</p> <p>Hazard - Clear description of the hazard and its adverse effects</p> <p>Not just electricity but damaged cable to the fan leading to electric shock!</p>	<p>Recommendation(s) to reduce the risks of the hazards causing harm and comment on existing controls.</p> <p>Give each recommendation a timescale for action.</p> <p>Remember to not just solve the problem today but to take steps to stop it recurring.</p> <p>Consider short and long term action</p> <p>Hint: Make sure you consider long term management controls to stop the problem re-occurring.</p>	<p>Give a realistic timescale for each action.</p> <p>Immediate (I)</p> <p>Or timescale e.g. 1 month, 3 months, 6 months.</p>
<p>Worked example</p> <p>Kitchen</p> <p>Variety of unmarked chemicals stored in food cupboard could lead to food contamination.</p>	<p>Separate out</p> <p>Provide separate store cupboard</p> <p>Provide info to staff on safe storage</p>	<p>Immediate</p> <p>1 week</p> <p>1 month then ongoing</p>

HAZARD SPOTTING
